

DODGE COUNTY SHERIFF'S OFFICE

Dale J Schmidt Sheriff Scott Smith Chief Deputy

FOR IMMEDIATE RELEASE

Date: November 19, 2018

Sheriff Dale J Schmidt

Office: 920-386-4115

dschmidt@co.dodge.wi.us

As we move into the holiday season, the Dodge County Sheriff's Office would like to remind residents that they can send text messages to 911 in Dodge County. This is a service we have provided for the last three years since November 2015. While Text-to-911 is available, it is not intended to replace a voice call to 911. A voice call to 911 is still the quickest, most efficient way to reach emergency help.

Text-to-911 is intended for:

1. Any person who is deaf, hard of hearing, or speech impaired.
2. Any situation where a person could be in danger if someone hears them placing a voice call, e.g., domestic violence or home invasion.
3. In an area with poor cell coverage where a voice call may not work, but a text could.
4. Other situations where a phone call may not be possible or safe.

Wireless customers in Dodge County should keep the following in mind when sending a text to 911:

1. While deactivated cellphones work for making voice calls to 911, wireless customers must have a texting plan in order to Text-to-911.
2. Text-to-911 is the same as texting anyone else. Just type 911 in the "To" field (no spaces or dashes) and begin the message.
3. Providing location information and nature of the emergency in the first text message is imperative, since the Dodge County Sheriff's Office will only receive an approximate location of the cell phone.
4. Text-to-911 should only be used for emergency situations that require an immediate response from police, fire, or emergency medical services. Non-emergency issues should still be called in on the Dodge County Sheriff's Office non-emergency line: 920-386-3726

5. Text-to-911 currently uses (SMS) short message service (basic text messaging) so there is a 160-character limit per text. Also no pictures or videos at this time.
6. Text abbreviations or slang should never be used as it can confuse the 911 call taker and potentially delay emergency response.
7. Because Text-to-911 uses existing cellular towers within Dodge County to route the text to the Communications Center, if a person sends a text in a border area, the text may be routed to another county, just like a wireless voice call to 911. If the other county does not provide Text-to-911, the person will receive an automatic bounce back message from their wireless provider advising them that Text-to-911 is not available and to place a voice call to 911.
8. Roaming is currently not supported for Text-to-911. Therefore, if a customer does not have wireless coverage within Dodge County, they will receive a bounce back message from their provider advising them to place a voice call to 911.

Remember, if you are in need of emergency assistance from Law Enforcement, Fire, or EMS
“Call if you can, Text if you can’t.”

Questions may be directed to Sheriff Dale J Schmidt.
