

February 14, 2022

Good morning Jim,

Here are our ARPA fund requests:

1. Bog removal. Very urgent project for the health of the Lake of Fox Lake since the bog restricts the flow from the western tributaries of Fox Lake resulting in silting and plugs the entire bridge of HWY A on the northwest corner of the lake. Also it blocks all fishing in that area. Krause Excavating has engineered a plan which includes a long reach hoe, traffic control, trucking away soil and permits at a cost of \$28,000.00. Total project to be funded by ARPA funds 2022/2023 project.
2. Police vehicle. This is our only police vehicle and is a 2013 with 143,000 miles and needs replacement. Ewald Automotive from Hartford has the state municipal contract and has submitted a bid for \$45,000.00 for a fully equipped 2022 Ford Interceptor. Total project to be funded by ARPA funds 2022/2023 project.
3. Culvert/bridge replacement. This culvert bridge on Delborn Lane was compromised in the last 2011 flooding and cost of replacement exceeds our budget. Karteschner Bros. Construction has engineered and bid a replacement at a cost of \$160,000.00. Bid includes all permitting, demolition of existing structure, traffic control and removal of present culvert and road debris. The bid includes a precast concrete culvert 12 feet in diameter. Project to be funded by ARPA funds 2022/2023 funds.
4. Town hall roof. Our shingled roof needs replacing. Rick Schwark Construction bid a steel roof with a 40 year plus life for \$46,800.00. This includes removal and disposal of existing roofing, application of water and ice barrier, installation of hidden seam steel and all trim and accessories. Total project to be funded by ARPA funds 2022/2023 project.

Thank you.

Sincerely,

Wayne Kok, Town Chairman, Town of Fox Lake
