The staff explained the hearing procedures to those in attendance;

1. PUBLIC HEARING – 7:00 P.M.

ANDREW WEINHEIMER for a variance to the terms of the setback provisions of the Dodge County Land Use Code Subsections 4.6.3 and Table 5.1-which refers to the distances that all buildings and other structures are required to be setback from all roads. On a State Highway, the required setback is 100 feet from its centerline or 67 feet from its right of way, whichever is the greatest distance of the two. According to County records, the required highway setback at this location is 109' feet from the centerline of State Road 33. As proposed, the Structural Addition (16' x 26' porch addition) will be approximately 68 feet and 6 inches from the centerline of State Road 33 or 31 feet 6 inches within the required setback, therefore prohibited by the code.

Also, according to Subsection 10.3.2 of the Code, additions and enlargements to existing nonconforming structures are allowed so long as they do not increase the extent of the nonconformity. In this case, the County considers your residence as a lawful existing nonconforming structure as the residence was apparently in existence prior to the adoption of the County Code. The County considers the addition as an enlargement of the nonconforming structure and therefore prohibited by the Code.

Motion by Jon Schoenike to approve with 3 conditions:

1. A variance agreement shall be required to be recorded with the Register of Deeds Office in the amount of the proposed construction projects prior to the approval of the land use permit.
2. All Federal, State and Local Municipality permits and approvals required for the proposed structures on this site shall be obtained for said projects prior to beginning construction.
3. A County Land Use Permit shall be obtained for the proposed construction projects prior to beginning construction of these projects.

According to County records, the required highway setback at this location is 75 feet from the centerline of South Ave. As proposed, the shed will begin at approximately 31 feet from the centerline or approximately 44 feet within the required highway setback lines and therefore prohibited by the code.
